SMART SOLUTIONS FOR LEARNING NEEDS

ABOUT US

We are an education, training and social innovation laboratory.

Together with our international network of experts and researchers in education, VET, technology-enhanced learning, social science, social welfare, policy and programme evaluation we work to develop, valorise and protect the potential and essence of people of all ages.

Our passion

Empowering people and organisations is what makes us tick. We create new knowledge-sharing tools to enhance people's skills and competences in any domain.

As an education, training and social innovation laboratory we develop new, user-friendly, technology-enhanced educational and training solutions to respond to the needs of diverse users.

Research & development of technology-enhanced training/learning tools:

- in the school system
- in the VET system
- in HR improvement
- in social welfare and inclusion

OUR FOCUS AREAS

Business competitiveness, Education & training, social inclusion

01. EMPOWERMENT & INCLUSION

We work to:

- **upgrade people** from digital literacy to digital empowerment
- **support inclusion** through technology-enhanced learning
- **address inclusion** through education and training

02. TAILORED DIDACTICS

How often do training courses receive a bad feedback? Didactics make a difference.

We specialize in designing training paths for specific training needs:

- collaborative approach in customers' needs analysis
- identifying training topics
- identifying methods and times
- selecting the best training tools
- creating a customised training path with a didactic approach

03. E-LEARNING SOLUTIONS

Knowledge is one of the powerful levers that organizations (both profit and not-for-profit) should use to obtain a competitive advantage that can drive them into efficiency. To help organizations achieve their goals we support the management in introducing a full range of services:

- customized LMS platform
- learning environment design
- learning assessment tools
- technology-enhanced learning

04. LEARNING THROUGH VIRTUAL REALITY

Virtual Reality starts uncovering its potential in learning scenarios.

One of the most powerful features that launched virtual reality in learning is that what is not possible in real life is possible in virtual reality. Thanks to virtual reality training environments user experience becomes immersive, more interesting, and fun!

Here's how VR can change your training experience:

- theory and practice combined
- real-life situations
- making learning fun and interesting
- complex situations made easy
- immersive environment

Anyone who stops learning is old, whether at 20 or 80
